**Subject:** FW: SB 4 - 4-inch Quarry Fine Layer Between J and K Streets in IR-02  
**Attachments:** STOCKPILES TRACKING MAP 2015-A\_08-12-15 (00000003).pdf; Quarry Fine Receivers.pdf; SB 4 - Stockpile Staging Area between J and K Streets.pdf

Info about the layer of material put down on IR-02 I mentioned yesterday.

Note the stockpile map is outdated and a lot of material has been removed.

Leslie

Subject: SB 4 - 4-inch Quarry Fine Layer Between J and K Streets in IR-02

Hi Leslie,

As follow-up to our conversation yesterday, SB 4 is a staging area between J and K Streets located within IR-02 that was constructed in March 2010 to provide a laydown area for "reuse for backfill" stockpiles and import material. A 4-inch layer of import quarry fines was placed so that these stockpiles would not be placed directly on the potentially radiologically impacted surface. Attached is the revised IR-02 stockpile tracking figure, which I will email with the revised inventory list tomorrow/Friday after Jarvis does his inspection this week. As discussed, I modified the location of the 4-inch layer of quarry fines "pad" to be more in line with the actual location based on the attached photos provided in "SB 4- Stockpile Staging Area between J and K Streets". Also attached are the receivers for the quarry fines received in March 2010 to construct the staging "pad". Based on this information, for the stockpile removals in this area, we are proposing to remove the piles to the ground surface.

This information will be included in the FCR for relocating the stockpiles to allow construction of the land bridge.

Please let me know if you have any questions, etc.

Thanks!

Shanti

## Montgomery, Shanti

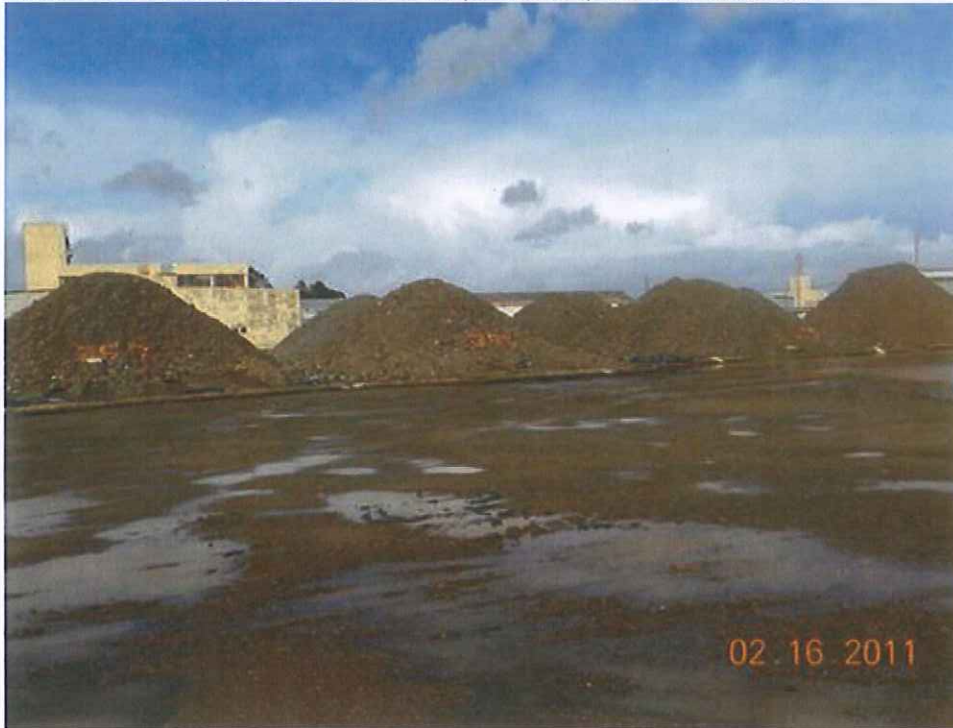

---

**From:** Dougherty, Bill  
**Sent:** Wednesday, February 16, 2011 2:17 PM  
**To:** Abkemeier, Erik  
**Cc:** 'zachary.edwards@navy.mil'  
**Subject:** RE: Call me?

Erik,

Concerning stockpiles, I thought I would send a picture to save lots of typing:

All Shaw soil from D1 is staged in Parcel G near former building 364/365/317. Since this Parcel has been cleared all of the piles are placed on plastic, sprayed with gorilla snot, and have waddles placed around each pile to keep the soil contained.

We stage the TtEC soil in Parcel E. This area was approved by RASO with the stipulation that we perform a walk over survey (no contamination was identified), and clean off-site quarry fines were used to construct this staging area. Since Parcel E is impacted, we do not place the soil on plastic.

Placement of  
quarry fines

area between J and  
K Streets where  
quarry fines were  
placed

All soil staged for ITSI due to chemical contamination is placed on plastic, sprayed with gorilla snot, and have waddles placed around each pile to keep the soil contained and to avoid chemically impacting, this rad impacted soil.

It's been this way for years, give me a call and we can discuss.

Bill sends...
